## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-5 and 7-11 are allowed.
2. The following is an examiner's statement of reasons for allowance: A Device for measuring the liquid volume in a tank comprising a suspension mechanism mounted at the tank port for supporting a load cell and a probe, including universal joint means to orient the load cell horizontally without regard to the orientation of the tank or tank port, in combination with all other limitations of the independent claim 1, is not disclosed nor deemed obvious in view of the prior art of record. Further, said device whereby segments are secured together without requiring rotation of any portion of the probe, including all limitations of independent claim 7, is not disclosed nor deemed obvious in view of the prior art of record. The universal joint that keeps the load cell oriented horizontally at all times as well as the probe segments being secured without a threaded screw means are novel in view of the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
